

XXIVth Cologne Minisymposium on Plant Biology

Wednesday – October 10th, 2018

- 12.30 – 13.15 **Miguel A. Blázquez,**
"An ancestral mechanism for the coordination of transcriptional programs."
- 13.15 – 14.00 **David Scheuring, TUK, Germany.**
"The plant vacuole – a multifunctional compartment "
- 14.00 – 14.45 **Andrea Sánchez-Vallet, ETH, Switzerland.**
"Host specialization in Zymoseptoria tritici."
- 14.45 – 15.15 30' Coffee Break
- 15.15 – 16.00 **Hendrik Küpper, Institute of Plant Molecular Biology, Czech Republic.**
"Metal metabolism in plants - from the whole-plant to the molecular level with a focus on biochemistry and biophysics."
- 16.00 – 16.45 **Claus-Peter Witte, Leibniz University of Hannover, Germany.**
"Purine and Pyrimidine Catabolism in Plants."
- 16.45 – 17.00 15' Coffee Break
- 17.00 – 17.45 **Paweł Bednarek, Institute of Bioorganic Chemistry, Poland.**
"Tryptophan derived metabolites in the immunity of Brassicaceae species."
- 17.45 – 18.30 **Frank Takken, University of Amsterdam, The Netherlands.**
"The good, the bad and the ugly: Unravelling the molecular basis of beneficial, pathogenic and commensal interactions between Fusarium oxysporum and tomato."
- 19.30 **Dinner in "Hellers Brauhaus", Roonstraße 33,
50674 Cologne**

Everyone (postdocs, PhD students....) is welcome to join!

Venue: Lecture Hall 0.024 Cologne Biocenter, University of Cologne, Zùlpicher Str. 47b, 50674 Cologne
